

Course Description: Dreamweaver MX: Level 1 is a hands-on course that will introduce you to the basics of the Dreamweaver MX Web development application. Students will create web sites that include frame-based pages, tables, graphics, and links. By the end of the course, students will have created an entire website in Dreamweaver MX and learned to upload the site to a server.

Who Should Attend: Web designers or prospective Web designers who want to use Dreamweaver's features to create Web sites efficiently will benefit from this course.

Prerequisites: Students must have a basic understanding of their computer's operating system. They should know how to launch an application, create and save files, and copy files from CDs and other media.

Benefits of Attendance: Upon completion of this course, students will be able to:

- Explain basic concepts about the Internet and the World Wide Web.
- Identify the basic issues concerning proper site design, and navigate in the Dreamweaver work environment.
- Define a site in Dreamweaver to organize and maintain the Web pages.
- Create a basic web page by typing text and applying character and paragraph formatting.
- Use Site Panel to create and organize files and folders.
- Insert images, set images properties, create and format tables.
- Add links within a site, create anchors, and specify external links, as well as use images as links, and create image maps.
- Build a frame-based set of pages.
- Upload a site to a remote Web server.
