

Course Description: This is a draft copy of the course information, subject to revisions & changes.

Securing Networks with ASA Advanced (SNA v1.0) is a new course to replace the Cisco Secure Virtual Private Networks (CSVPN) course & portions of the Securing Networks with PIX and ASA (SNPA) course.

In order to cover new features in ASA software v8.0 and to fully cover the VPN features of the ASA, the content of SNPA was split into two courses, one that covers the fundamentals, SNAF, and one that covers more advanced topics, SNA v1.0.

SNA v1.0 also utilizes the graphical user interface instead of the command line interface for explanation and discussions of configuring the ASA.

Who Should Attend: This course is for Employees, Channel Partners/Resellers, and Customers.

Prerequisites:
